PROFESSIONAL SUMMARY

Cybersecurity engineer with 4+ years securing national-scale government platforms, tier-1 banking systems and law-enforcement infrastructure. EC-Council Licensed Penetration Tester (Master) delivering full-lifecycle VAPT across web, mobile, API and network attack surfaces — and engineering the defensive side to match, having architected enterprise SOC's on FortiSIEM/FortiSOAR and IBM QRadar and operated at L3 on a live managed service. Reports at both technical and board level.

CAREER HIGHLIGHTS

- Designed and handed over the **Security Operations Centre for Bangladesh Police**, and operated a multi-tenant **managed SOC service at L3** across a shared-service customer base.
- Reduced average SOC alert triage time by **40%** through correlation-rule design and automated response playbooks on FortiSIEM and FortiSOAR.
- Secured **six national government platforms** and established governed vulnerability-management programmes at **three financial institutions**.
- Reported **100+ vulnerabilities** across web, API, mobile, infrastructure and cloud-hosted environments, each with a reproducible proof of concept and CVSS v3.1 rating.
- Awarded **LPT (Master)** for a top-decile score on EC-Council's 24-hour C|PENT practical examination — a hands-on, fully assessed penetration-testing exam.

CORE COMPETENCIES

Offensive Security	Vulnerability Assessment & Penetration Testing (VAPT) Web · API · Mobile · Network Penetration Testing Red Team / Adversary Simulation Privilege Escalation & Lateral Movement Business-Logic and Authentication Attacks Exploit Validation & Proof-of-Concept Development
Defensive Engineering	Security Information & Event Management (SIEM) Architecture Security Orchestration, Automation & Response (SOAR) Security Operations Centre (SOC) Build-out and L3 Operations Detection Engineering & Use-Case Design MITRE ATT&CK Threat Hunting Incident Response & Digital Forensics
Programme & Advisory	Vulnerability Management Programmes Executive and Board-Level Risk Reporting Remediation SLA Governance Security Awareness & Technical Training Delivery Client & Stakeholder Engagement
Standards & Method	OWASP Top 10 (Web · API · Mobile) OWASP Web Security Testing Guide OWASP MASVS / MASTG CVSS v3.1 PTES MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cybersecurity Engineer

Sept 2025 – Present

Synesis IT PLC · Kawran Bazar, Dhaka, Bangladesh

- Lead **full-lifecycle VAPT engagements** across web applications, Android/iOS mobile apps, REST and GraphQL APIs and enterprise networks — from scoping and threat modelling through exploitation, validation and executive debrief.
- Deliver security assessments for **six national-scale government platforms** — NEIR, Income Tax eReturn, eTIN, the Election Commission chatbot, the National Job Portal and the Conway conferencing platform — escalating critical findings directly to government stakeholders.
- Design **adversary-simulation scenarios** covering privilege escalation, lateral movement, credential harvesting, account takeover and multi-stage data exfiltration, quantifying exploitable risk rather than raw scanner output.
- Exploit and document **OWASP Top 10 (Web, API, Mobile)** classes — SSL-pinning bypass, IDOR/BOLA chains, JWT signature and exposure flaws, OAuth misconfiguration, payment and business-logic manipulation — each finding shipped with a reproducible PoC and CVSS v3.1 rating.

- Produce **board-ready assessment reports** with executive risk narratives and SLA-tracked remediation plans, and work alongside Blue Teams to convert findings into validated detection coverage.

Cybersecurity Engineer

Jul 2024 – Aug 2025

Smart Technologies (BD) Ltd · Agargaon, Dhaka, Bangladesh

- Designed and delivered the **Security Operations Centre for Bangladesh Police** — log-source architecture, correlation logic, incident workflow and analyst enablement for a national law-enforcement environment.
- Served as **L3 SOC Analyst on a multi-tenant managed SOC service**, owning escalated investigations, threat hunting, containment decisions and customer-facing incident reporting.
- Built an enterprise SOC on **FortiSIEM and FortiSOAR** with 25+ custom correlation rules and automated response playbooks, **reducing average alert triage time by 40%**.
- Led the R&D deployment of **IBM QRadar and IBM Security SOAR**, developing use-case libraries covering insider threat, lateral movement and ransomware behaviour.
- Ran **MITRE ATT&CK-mapped threat hunts** across endpoint, network and cloud telemetry; identified and contained three high-severity incidents before escalation.
- Rolled out **Rapid7 InsightVM, Tenable SecurityCenter, Metasploit Pro and Burp Suite Enterprise** across multi-tenant environments and defined the remediation SLA benchmarks adopted by client organisations.

Cybersecurity Engineer

Jul 2023 – Jul 2024

BRACNet Limited · Mohakhali, Dhaka, Bangladesh

- Delivered end-to-end VAPT of a **Tier-3 Data Centre and core network**, surfacing 20+ vulnerabilities including critical misconfigurations and viable privilege-escalation paths.
- Architected a **complete open-source SOC** — Wazuh, Suricata, pfSense, Grafana, TheHive, Shuffle, Cortex, MISP and Keycloak — delivering SIEM, SOAR, IDS/IPS and threat-intelligence capability with zero licensing spend.
- Deployed **SentinelOne and Trend Micro EDR** fleet-wide and delivered hands-on security training to 50+ technical and business stakeholders.
- Authored technical documentation and solution proposals, and evaluated vendor specifications against organisational security requirements.

Penetration Tester

May 2022 – Jun 2023

Cyber Bangla · Remote

- Reported **100+ vulnerabilities** across web applications, REST APIs, mobile platforms, on-premise infrastructure and cloud-hosted environments for fintech, e-commerce and public-sector clients.
- Produced client-facing penetration-test reports with PoC evidence, CVSS scoring and executive summaries, and supported retest cycles through to closure.

RESEARCH & ACADEMIC EXPERIENCE

Cybersecurity Researcher

Jan 2019 – Jun 2022

ICE Innovation Lab, Islamic University Bangladesh · Kushtia

- Conducted applied research in web exploitation, malware analysis, digital forensics, cryptography and network security, contributing to peer-reviewed publication.
- Built and validated an **SDN-based framework for real-time DDoS detection and mitigation** — designed the detection logic, implemented controller-side mitigation and benchmarked it against simulated volumetric and low-rate attack traffic.
- Represented the university in **10+ national and international CTF competitions**, including DefCamp CTF (Romania), the BGD e-GOV CIRT National Cyber Drills and BUET CSE Fest.

KEY ENGAGEMENTS & PROGRAMMES

- **Bangladesh Police SOC Deployment** — end-to-end design, build and handover of a Security Operations Centre for national law enforcement, including detection content and analyst run-books.
- **Multi-Tenant Managed SOC Service** — L3 escalation ownership, detection tuning and customer-facing incident reporting across a shared-service customer base.
- **Enterprise Banking Vulnerability Programmes** — Tenable.io at Shahjalal Islami Bank, Tenable.sc at Al-Arafah Islami Bank and Rapid7 InsightVM with Metasploit Pro at Global Islami Bank; three institutions moved from ad-hoc scanning to governed vulnerability management.

- **IBAS++ National Platform Security Programme** — implemented Burp Suite Enterprise, Metasploit Pro and Tenable.sc+ for the Integrated Budget and Accounting System, and delivered a 9-day professional training programme to 30+ government personnel.
- **Open-Source SOC Architecture** — a full SIEM, SOAR, IDS/IPS and threat-intelligence capability assembled from Wazuh, Suricata, pfSense, Grafana, TheHive, Shuffle, Cortex, MISP and Keycloak.

CERTIFICATIONS

LPT (Master) — Licensed Penetration Tester	Aug 2026
EC-Council · awarded at ≥90% on the C PENT practical examination · Cert. ECC5016372948	
C PENT — Certified Penetration Testing Professional	Aug 2026
EC-Council · 24-hour hands-on practical examination · Cert. ECC4512798630	
CEH (Practical) — Certified Ethical Hacker	Jan 2024
EC-Council · ANSI National Accreditation Board accredited · Cert. ECC8914703526	
CNSP — Certified Network Security Practitioner	Jun 2024
The SecOps Group · passed with Merit · ID 8803550	
FortiSIEM 6.3 & FortiSOAR Administrator 7.3	Nov 2024
Fortinet Training Institute · FCP curriculum, course completion	
API Penetration Testing & API Security Fundamentals	2023 – 2026
APIsec University
