EXECUTIVE SUMMARY

High-impact cybersecurity professional with 4+ years of enterprise-grade experience securing **national-scale government infrastructure, multinational banking systems, and complex enterprise environments**. Proven record executing full-lifecycle VAPT engagements — from threat modeling and exploitation through executive reporting — across web, mobile (Android/iOS), API, cloud, and network attack surfaces. Deep practitioner expertise in **SIEM/SOAR engineering (FortiSIEM, IBM QRadar, Splunk), vulnerability management (Tenable, Rapid7), and open-source SOC architecture**. Published researcher and international CTF competitor, equally effective at strategic advisory and deep technical levels.

CORE COMPETENCIES

▶ Penetration Testing (VAPT)	▶ Web Application Security	▶ API Security Testing
▶ Mobile Security (Android/iOS)	▶ Network & Infrastructure PT	▶ Cloud Security Assessment
▶ SIEM / SOAR Engineering	▶ SOC Deployment & Operations	▶ Threat Hunting & IR
▶ Vulnerability Management	▶ Digital Forensics & Malware	▶ Red Team Operations

PROFESSIONAL EXPERIENCE

Senior Cybersecurity Engineer

Sept 2025 – Present

Synesis IT PLC · Kawran Bazar, Dhaka

- Spearhead full-lifecycle VAPT engagements across web, mobile (Android/iOS), REST/GraphQL APIs, cloud, and enterprise networks — consistently uncovering critical-severity vulnerabilities before production deployment.
- Engineer adversarial attack simulations — privilege escalation, lateral movement, credential harvesting, account takeover, and multi-stage data exfiltration — to quantify real-world organizational risk.
- Lead OWASP Top 10 assessments (Web, Mobile, API) specializing in SSL pinning bypass, IDOR chains, JWT manipulation, OAuth flaws, and business-logic vulnerabilities; deliver validated PoC exploits with CVSS ratings.
- Author board-ready VAPT reports with executive risk narratives and SLA-tracked remediation; partner with SOC and Blue Teams to validate detection coverage — improving MTTD by an estimated **30%**.

Cybersecurity Engineer

Jul 2024 – Aug 2025

Smart Technologies (BD) Ltd · Agargaon, Dhaka

- Architected and deployed an enterprise SOC with FortiSIEM and FortiSOAR — log sources, correlation rules, and automated response playbooks — cutting alert triage time by **~40%**.
- Led R&D deployment of IBM QRadar and IBM Security SOAR; built use-case libraries covering insider threat, lateral movement, and ransomware behavioral patterns.
- Performed MITRE ATT&CK-mapped threat hunting across endpoint, network, and cloud telemetry; identified and contained **3 high-severity incidents** pre-escalation.
- Operationalized Rapid7 InsightVM, Tenable SecurityCenter, Metasploit Pro, and Burp Suite Pro across multi-tenant environments, establishing enterprise vulnerability SLA benchmarks.

Cybersecurity Engineer

Jul 2023 – Jul 2024

BRACNet Limited · Mohakhali, Dhaka

- Executed end-to-end VAPT of BRACNet's Tier-3 Data Center and core network infrastructure, surfacing **20+ vulnerabilities** including critical misconfigurations and privilege-escalation paths.
- Designed and deployed a full open-source SOC stack (Wazuh · Suricata · pfSense · Grafana · TheHive · Shuffle · Cortex · MISP · Keycloak) delivering SIEM, SOAR, IDS/IPS, and threat intel at near-zero licensing cost.
- Implemented SentinelOne and Trend Micro EDR fleet-wide; delivered hands-on security training to **50+ stakeholders**.

Penetration Tester

May 2022 – Jun 2023

Cyber Bangla · Remote

- Conducted comprehensive VAPT across web applications, REST APIs, mobile platforms, on-premise infrastructure, and cloud — reporting **100+ vulnerabilities** with risk-ranked remediation guidance.
- Produced professional penetration test reports with PoC evidence, CVSS scoring, and executive summaries for fintech, e-commerce, and government clients.

- Conducted applied research in web exploitation, malware analysis, digital forensics, cryptography, and network security; contributed to peer-reviewed publications and conference proceedings.
- Represented the university in **10+ national and international CTF competitions** including DefCamp CTF (Romania), National Cyber Drills, and BUET CSE Fest.

SELECTED PROJECTS

- National Government Infrastructure VAPT** — security assessments of national-scale platforms: NEIR, Income Tax eReturn, eTIN, Election Commission Chatbot, National Job Portal, and the Conway meeting platform; critical findings delivered directly to government stakeholders.
- Enterprise Banking Security Deployments** — deployed Tenable.io (Shahjalal Islami Bank), Tenable.sc (Al-Arafah Islami Bank), and Rapid7 InsightVM + Metasploit Pro (Global Islami Bank) — vulnerability management programs for three financial institutions.
- FortiSOAR / FortiSIEM SOC Deployment** — full-stack Fortinet SOC with 25+ custom correlation rules and automated IR playbooks; operated as L3 SOC Analyst for advanced threat detection.
- Open-Source SOC Architecture** — designed and operationalized a complete open-source SOC (Wazuh, Suricata, pfSense, Grafana, TheHive, Shuffle, Cortex, MISP, Keycloak) for SIEM, SOAR, IDS/IPS, and threat intelligence.
- IBAS++ Platform Security Program** — implemented Burp Suite Enterprise, Metasploit Pro, and Tenable.sc+ for the national Integrated Budget and Accounting System; delivered a 9-day professional training to 30+ personnel.
- DDoS Detection Research (SDN)** — developed and validated an SDN-based framework for real-time DDoS detection and mitigation — published at ICT-CEEL 2023 International Conference.

TECHNICAL TOOLSTACK

SIEM & SOAR	FortiSIEM · FortiSOAR · IBM QRadar · IBM Security SOAR · Splunk · Wazuh · Security Onion
Vuln Management	Tenable.io · Tenable.sc · Rapid7 InsightVM · Acunetix · Nessus · OpenVAS
Pentest & Red Team	Metasploit Pro · Burp Suite Pro · SQLmap · Hydra · Responder · CrackMapExec · Netcat
Web & API	OWASP ZAP · Postman · SoapUI · Nikto · Gobuster · Dirsearch · ffuf · WPScan
Mobile Security	MobSF · Frida · Objection · APKTool · JADX · Drozer · Ghidra · IDA Pro
Network & Forensics	Nmap · Wireshark · tcpdump · Masscan · Autopsy · Volatility · FTK Imager · OpenStego
EDR / Endpoint	SentinelOne · Trend Micro · Windows Defender ATP
Scripting & OS	Python · Bash · C/C++ · Kali Linux · Parrot OS · Ubuntu · RHEL/CentOS · Windows Server

CERTIFICATIONS & PUBLICATION

- ◆ **Certified Ethical Hacker (CEH) — Practical** — EC-Council
- ◆ **Certified Network Security Practitioner (CNSP)** — The SecOps Group
- ◆ **API Penetration Testing & API Security Fundamentals** — APIsec University
- ◆ **IBM QRadar SIEM — Technical Sales Intermediate** — IBM
- ◆ **Cyber Security & Ethical Hacking Specialization** — Arena Web Security
- ◆ **CompTIA PenTest+ pathway · Networking · Python · Intro to Cybersecurity** — TryHackMe · Google · Univ. of Michigan · Cisco

PUBLICATION “Cybersecurity Based on Honeypot System” — ICT-CEEL 2023 International Conference on Technologies for Computer, Electrical, Electronics and Communication.

EDUCATION

B.Sc. in Engineering (ICT)
Islamic University, Bangladesh
2018 – 2023 · CGPA 3.44 / 4.00

Higher Secondary Certificate (HSC)
Biharilal Shikder Govt. College
2014 – 2016 · GPA 5.00 / 5.00

AWARDS & RECOGNITION

- ★ 2nd Runners-Up — Inter-University Cyber Drill 2022, BGD e-GOV CIRT
- ★ Champion & Best Presenter — IEEE IU SB Idea Contest 2019
- ★ Champion — Project Showcasing, Book & Digital Innovation Fair, IU
- ★ International Qualifier — DefCamp CTF 2022, Romania
- ★ Participant — National Cyber Drills 2021 & 2022, BGD e-GOV CIRT
